MAIN OBJECTIVES

INTRODUCING THE BENEFITS OF SKATING

The Inline Certification Program aims to facilitate the growth and development of passionate skaters, dedicated to spreading the benefits of inline skating world wide.

We achieve this by delivering a high standard in quality teaching in inline skating.

This high standard is then developed into a certification mechanism that focuses on safety, fun and learning.

Together with people from around the world sharing and learning, elevating the industry.

CONFIRMED GLOBAL EXAMINERS YOU WILL BE LEARNING FROM

Currently three international examiners are confirmed to head the programs at the Bali ICP Certification and Global Skate Summit.

Their resumes speak for themselves and are actively involved in either teaching, products, sponsorships, business and management of inline skating.

Throughout the event you will be able to converse, ask questions and pick their brains on anything related to skating.

More examiners are yet to confirm.

Skating was one of the items on my bucket list, and I accomplished it by enrolling in a professional state school that used the ICP program as its teaching model. Although I struggled to pass the program, the instructors' encouragement motivated me to apply the ICP methodology in many areas of my life. This experience not only improved my skating skills but also proved invaluable in my career growth. In fact, I was able to get into MNC and advanced well. Thanks to the ICP program, I continue to grow professionally and personally. Today, I'm passionate about sharing my experience with others and dispelling the myth that ICP is just for skating instructors. If you have any questions, please don't hesitate to reach out to me at miketang@hotmail.com.
